

Tushar Pant

Senior Software Engineer | Full Stack MERN Developer | React, Node.js, TypeScript, AWS

India | +91 9794516644 | tarkesh2shar@gmail.com | linkedin.com/in/tushar-pant-46075497 | github.com/tarkesh2shar

SUMMARY

Full-stack software engineer with 7+ years of experience building React, Node.js, TypeScript, and MERN products across enterprise, commerce, communication, and mobile teams. Strong in reusable UI systems, API/middle-service development, testing, real-time workflows, AWS serverless architecture, and DevOps learning through Docker/Kubernetes projects. Known for converting product/design requirements into maintainable components and production-ready features.

CORE SKILLS

Frontend	React.js, TypeScript, JavaScript, Redux, SCSS/Sass, CSS logical properties, Storybook/Chromatic, responsive UI
Backend	Node.js, Express, REST APIs, microservices, JWT/auth, WebSockets, gRPC, MySQL, MongoDB
Cloud/DevOps	AWS CDK, Lambda, API Gateway, Cognito, DynamoDB, SQS, EventBridge, Docker, Kubernetes, Scaffold, CI/CD
Testing	Jest, React Testing Library, Enzyme, Cypress, Nightwatch.js, Mocha, Chai, Istanbul, AWS synthetic tests
Mobile/Other	React Native, Android, Flutter/Dart, Three.js, RabbitMQ/AMQP, NATS, Python ML practice

CERTIFICATIONS

AWS Certified Developer - Associate - Amazon Web Services, issued Oct 2025, expires Oct 2028; AWS Cloud Quest: Serverless Developer - Amazon Web Services, issued Jul 2025; Building with the Claude API - Anthropic, issued Mar 2026; Model Context Protocol: Advanced Topics - Anthropic, issued Apr 2026; Introduction to Model Context Protocol - Anthropic, issued Apr 2026; Claude Code in Action - Anthropic, issued Mar 2026

PROFESSIONAL EXPERIENCE

Senior Software Engineer (A3), previously Software Engineer (A2) | EPAM Systems / EPAM Anywhere

Apr 2022 - Present

Remote

- Build and maintain production React.js features for an international client team, translating product and Figma requirements into reusable, tested UI components.
- Review PRs, guide implementation decisions, and support team formation/engineering practices across frontend delivery.
- Develop Node.js middle-service APIs and contribute to code migration toward TypeScript for safer, more maintainable delivery.
- Design and work with AWS serverless/event-driven resources using CDK, Lambda, API Gateway, Cognito, SQS, EventBridge, DynamoDB, and synthetic tests.
- Cover quality through unit, integration, API contract, Cypress/Nightwatch, Storybook/Chromatic, React Testing Library, and AWS synthetic testing.

Software Development Engineer I | Blinkit (Grofers)

Aug 2021 - Mar 2022

Hybrid

- Worked with the Experience Team across React Native, Android, and web-facing release workflows.
- Built and debugged native-to-React Native bridge communication and contributed to out-of-stock product experiences across Android and React Native.
- Owned continuous delivery/code-push movement from staging to production across iOS, Android, and web platforms.

Full Stack Developer | Acquire.io

Jun 2020 - Aug 2021

Remote

- Delivered frontend and backend features for the VOIP team using React.js, Redux, Node.js, MySQL, Redis, RabbitMQ, gRPC, and Git.
- Built reusable React components and real-time state synchronization through WebSockets so data stayed consistent across devices.
- Built APIs in a microservices architecture and explored integrations with RingCentral, Dialpad, Twilio webhooks, Google Speech-to-Text, IBM Watson, and AWS alternatives.
- Wrote API unit tests with Mocha/Chai and measured coverage with Istanbul.

Full Stack Engineer | CodeMaya

Feb 2020 - Apr 2020

- Contributed to an e-commerce style web app with Node.js, MongoDB, React.js, REST APIs, JWT authentication, and Git.
- Built backend features for deal scraping/listing, signup/signin, push notifications via OneSignal, and SEO-friendly meta-tag sharing.

Full-stack Developer | Freelancer

Jan 2018 - Dec 2019

Remote

- Built React, MERN, Flutter, and React Native experiments, including YouTube players, blog apps, fake e-commerce, Apex stats with Paytm, and Flutter widget prototypes.
- Worked with designers to bring screens to life and used React, Redux, MongoDB, Express, Passport Google OAuth, PayPal/Paytm, Bootstrap, Expo, and Heroku.

SELECTED PROJECTS

Node Docker Kube Microservice - Node/Docker/Kubernetes microservices with auth, tickets, orders, payments, expiration services, shared common code, Scaffold, infra, and NATS-style event thinking. <https://github.com/tarkesh2shar/node-docker-kube-microservice>

React SSR + Express/Webpack - Server-side rendered React/Redux app using Express, Webpack, React Helmet, API proxying, SCSS/CSS support, file imports, and autoprefixing. <https://github.com/tarkesh2shar/reactSSR>

Docker AWS CI Pipelines - Single and multi-container Docker CI/CD experiments deploying to AWS with Travis, ECR-oriented container separation, and NGINX proxy/TLS termination. <https://github.com/tarkesh2shar/multi>

expressydecorators - TypeScript Express decorator package experiment using reflect metadata, Swagger UI, and reusable backend routing patterns. <https://github.com/tarkesh2shar/expressydecorators>

Machine Learning Practice - Python practice repo covering regression, classification, clustering, model selection, PCA/LDA, SVM, random forests, and reinforcement learning exercises. <https://github.com/tarkesh2shar/machineLearningPractice>

React Native for Web / Flutter - Cross-platform UI work with Expo, React Native for Web, Flutter Provider boilerplate, and Android app experiments. <https://github.com/tarkesh2shar/reactNativeForWeb>

EDUCATION & TRAINING

B.Tech, Electrical and Electronics Engineering - United College of Engineering and Research, APJAKTU, 2017

Industrial Training: Power Distribution Systems at Bharat Pumps and Compressor Ltd.; PLC and SCADA training at Sofcon India Pvt. Ltd.

Earlier technical work: Arduino ATmega328P animatronics hand controller, college robotics/drone projects, Android weather/camera/geolocation apps.
